

IGOR DZICHKOVSKII

Senior MERN Stack Developer | Software Engineer

Valencia, Spain | +34 603 11 79 19 | Igordzich@gmail.com | [LinkedIn](#) | [GitHub](#)

TECHNICAL SKILLS

Frontend: React, NextJS, TypeScript, Tailwind CSS, Styled-Components, HTML/CSS

Backend: Node.js, Express, NestJS, Python (Flask), gRPC

Infrastructure & DB: SQL and NoSQL databases, Docker, Linux (Debian, Ubuntu, Arch)

PROFESSIONAL EXPERIENCE

Senior Full-Stack Developer | AllFunds Bank

2025 – 2026

- **Architected and implemented** from scratch the infrastructure of a new core banking product as part of a 3-person team, establishing coding standards for both frontend and backend.
- **Integrated and adapted** AllFunds APIs, translating complex investment data flows into an optimized, highly scalable solution for retail banking clients.
- **Engineered** an internal UI component library, standardizing the design system and significantly reducing development cycles for new interface features.
- **Built** backend calculation engines for real-time processing of internal and client financial data, ensuring absolute transactional accuracy and high availability.

Senior Front-End Developer | Sopra Steria

Jul 2022 – 2025

- **Optimized and scaled** 3 production-level applications, significantly improving rendering performance, application load times, and overall codebase maintainability.
- **Implemented** strongly typed, high-performance communication between Front-End and Back-End services using gRPC.
- **Developed** highly reusable components and custom hooks in React and TypeScript, cleanly encapsulating business logic on the client side.
- **Designed and executed** comprehensive unit and integration test suites to ensure robust delivery and minimize production regressions.

Full-Stack Developer | UKPIK Productions

Aug 2021 – Jul 2022

- **Developed** a geolocated platform featuring dynamic filtering and real-time data processing for location management, utilizing the MERN stack (Node.js, Express, MongoDB, React).
- **Implemented** an end-to-end multimedia file management system featuring seamless content preview, strict access control, and permissions management.
- **Created** administrative dashboards and internal collaboration tools for production teams using Python and the Flask framework.

Junior Mobile Developer | Camillion

May 2019 – Jul 2021

- **Executed** deep refactoring of legacy code and structured debugging, significantly increasing the overall stability and performance of the mobile application.
- **Integrated** automated testing methodologies (unit and integration) to streamline the CI/CD deployment cycle.

EDUCATION

Master in Computer and Network Engineering <i>Polytechnic University of Valencia</i>	2019 – 2020
Master in Languages and Technology <i>Polytechnic University of Valencia</i>	2018 – 2019
Bachelor in Spanish Linguistics <i>Peoples' Friendship University of Russia</i>	2014 – 2018

LANGUAGES

Spanish: C2 (Bilingual) | **English:** C1 (Professional) | **Russian:** C2 (Native)
